

ScanAfia X-ICU bed for Intensive Care Units

NEW! Versatile ICU-bed with extensive features

The quality ScanAfia X-ICU bed is a safe choice for hospital intensive care units. Practical design features provide excellent quality-price ratio. Scan Afia X-ICU bed also fulfils the requirements of the new EN 60601-2-52:2010 standard for medical beds.

Although it can take loads up to 340 kg, the ScanAfia X-ICU bed is still light and easy to manoeuvre, thanks to its Ø150mm design twin castors. As a unique feature you may also have electrically lockable set of castors.

The design of the bed emphasizes both ergonomic working and patient comfort and accessibility; its exceptionally low minimum height makes work easier for nurses and makes getting out of bed easier for patients. The back section slide mechanism also improves patient comfort. The bed also features an extremely broad electric Trendelenburg/anti-Trendelenburg adjustment range.

ScanAfia X-ICU's standard features also include:

nurse control panel, electric CPR function, back section slide, battery function and extensive range of quality accessories.

Our many years' experience in designing and manufacturing hospital and ICU beds ensures that the ScanAfia X-ICU provides a long service life with minimal need for maintenance.

NEW!
Practical design with extensive height range, adequate SWL.

ScanAfia X-ICU bed with pair of side rails, electrically locking set of castors, Hygiene Mattress Mediflex

LOJER® For easy care
