

4050X Gynaecological Examination Table

Hygienic easy-to-use examination table for multiple purposes

Main features:

1. Easy to adjust entirely hands-free, which makes healthcare personnel's work more hygienic and effective
2. Designed especially for gynaecological examinations, but it's suitable also for minor procedures and general examinations
3. New features that improve usability, comfort and patient safety

The 4050X gynaecological examination table is the most versatile examination table in our range. It is particularly well suited for gynaecological examinations, but it can also be used in minor procedures and general examinations. The 4050X gynaecological examination table features a three-piece table top with seat section, middle section and back section adjustments. Seat, middle section and height can be adjusted from the front of the table using the new gynaecological foot control set, which makes healthcare personnel's work more hygienic and effective. As an option, you can also add a two-piece hands-free adjustment bar to the side of the table or use the hand control that is a standard feature.

In addition to the new hygienic gynaecological foot control set, the upholstery material is extremely durable and antimicrobial fabric that is also easy to clean, waterproof and has excellent disinfectant features. As standard the 4050X is equipped with adjustable heel supports (stepless and no levers) and a gynaecological bowl, that is easy to move out of the way when not needed. 4050X's motors lower using gravity and in emergency situations - if there's something caught between the mechanism – table rises automatically.

There are two models of 4050X available. The 4050X M has a smaller number of features, whereas 4050X F is more extensive - f.ex. it has a hand control with memory slot, electric seat adjustment and the new gynaecological foot control set (see technical data and features for more details).
