

FYSICON COMFORT-33

Hygienic mattress

High-quality hygienic mattress with grooved core

Purpose of use

- Fysicon Comfort-33 is an excellent mattress for hospitals, nurcing homes and home care.
- Weight recommendation for hospital use < 150 kg. If using by a heavy person or 24 hours/day, lifetime is shorter than normally (recommendation in public health care 3-5 years).

Product structure

- Core D33145 (33 kg/m³) fire retardant foam with zoned grooves on the other side.
- Cover polyurethane coated hygienic bi-elastic fabric, which is impermeable to liquids but still breathable. Material is bi-elastic and treated against bacteria and fungi (active biocidal substance is zinc pyrithione (EU 528/2012). Zipper on two sides, protected with flap.

Benefits

- Because of the grooved core, you can choose softer or firmer side up. There are lower grooves on the pelvis area, so mattress is durable. Deeper grooves on the shoulder area make pleasant sleeping on the side.
- Grooves are also making better ventilation and helping to bend mattress in adjustment beds.

Cleaning and maintenance

- Disinfection by wiping according to the instructions with diluted chlorine-amine or an alcohol-based detergent or ethanol /chlorine max 1000 ppm, rinse and dry thoroughly. If necessary, wash the cover 70-95°C inside out, gentle tumble drying at low temperature.
- Turn the mattress regularly to ensure even wear. Replace broken cover to a new one.
- The bed frame should be lathed or perforated to allow for proper ventilation.

Flame retardancy & CE

Flammability by standard IMO FTPC part 9. Fysicon mattresses are CE-marked. Country of origin Finland.
